I My First book using Microdown

1 Compilation **3**

1.1 Welcome to Pillar's little user-guide !! 3

2 Edition and Templates **5**

Part I

My First book using Microdown

CHAPTER 1

Compilation

Figure 1-1 Pillar logo

1.1 Welcome to Pillar's little user-guide !!

To write a book, you can create chapters and include them into `book.pillar` or directly edit the file. If you don't know "Pillar", check its documentation at http://github.com/pillar-markup/pillar

CHAPTER 2

Edition and Templates

There is also a template system, you can find template in the folder `_support-/template`. Some template are already written, but if you want to have your own, you had two solutions:

- edit the existing template related to the format you want to change (recommanded)
- create your own template with its own name

You will found some template examples in `_support/template` folder to see how it works. The default template system is Mustache.

Output directory's default name is "book-result" but you can change it in the pillar.conf file by editing the`OUTPUTDIRECTORY` variable
